Stoughton Utilities employees complete Management Training Program

Stoughton Utilities employees Erin Goldade and John McLain recently graduated from the Municipal Electric Utilities of Wisconsin (MEUW) Management Training Program. This program consists of six sessions over a two-year period, and is designed for both existing managers and future management prospects.

Goldade and McLain join past Stoughton Utilities graduates Brian Erickson, Sean Grady, Brian Hoops, and Kim Jennings in completing this achievement. Goldade, with seven years of service at Stoughton Utilities, and McLain, with 11 years of service, were part of a graduating class of eight municipal utility employees from across the state.

Program topics included communication, time and project management, leadership and team building skills, utility planning and risk management, utility accounting and finance, personnel issues, and customer service and public relations.

"We are proud to see Erin and John complete their management certification," said Kardasz. "The training and knowledge they have received through the MEUW program will help them both perform skilled tasks and demonstrate strong leadership at Stoughton Utilities."

Program graduates pictured left to right: Paul Raab, Reedsburg Utility Commission; Amy Brick, Kaukauna Utilities; Casey Engebretson, Black River Falls Municipal Utility; Erin Goldade, Stoughton Utilities; John McLain, Stoughton Utilities; John Richmond, Marshfield Utilities; Brett Schuppner, Reedsburg Utility Commission; and Nicolas Whipple, Marshfield Utilities.
